Contingency Real Estate Support

Reporting

Prototype June 2001

Objective

Make the user aware of the various reporting mechanisms available for use *and* of those required for program management

Why Report?

- Accountability to Public
- Accountability to FEMA
- Property use (lease rental) payment
- Smooth team transition
- Easy location of data
- Status of missions

Communication, communication, communication

Reports

- Situation Reports (Sitreps) and Spotreps
- Financial Reports
- Transition and Close Out
- Real Estate Instrument Status Tracking and Management
- After Action with Lessons Learned

Reporting Tools

- ENGLink and ENGLink LT
- Emergency Power Information System
- Personnel Deployment Module
- RFMIS
- REMIS
- CEFMS

Prototype June 2001

READINESS 2000

Readiness 2000 (R2K) is a new way of doing business. R2K organizes and manages U.S. Army Corps of Engineers Readiness resources through a national strategy and aligns the Readiness community into a corporate team that shares planning responsibilities and response capabilities.

- PRT Training Documents & Team Guides
- Readiness Support Center Homepage
- Latest R2K Power Point Briefing
- Updated PRT Briefing(2/1/2000)

Readiness Implementation Team (RIT)
The RIT is a team of experienced professionals within the Corps Readiness/Emergency Management community. This team will be working on products to facilitate our transition to the Readiness 2000 concept.

- Team Members
- Oversight Steering Committee
- Command & Control
- Action Matrix
- Briefings

R2K Program Strategies
The Director of Civil Works has approved the following major Readiness program strategies:

- Threat/History Based Resource Allocation
- Planning & Response Teams
- Deployable Tactical Operations Systems (DTOS)
- Centralized All-Hazards TEECA Mission
- Reponse Support Templates & National Database

Other R2K Initiatives:
- PARC Coordination
- Public Affairs PAT
- Emergency Manager of the Future

Situation Report

Start Date: 201354zSep2000 **Valid as of:** 201803zSep2000

Report Number: 090 **SITREP Date:** 201354zSep2000

Situation

A. General Information

- The Forest Service reports the Cerro Grande fire destroyed almost 48,000 acres and over 400 dwellings damaged or destroyed. FEMA has issued taskers to the Corps to provide temporary housing.

- The ESF #3 cell at the DFO was deactivated on 28 June 2000.

- DOE requested assistance to design and build flood prevention projects and the Corps is currently responding to that request with evaluations, designs and construction.

- BIA requested assistance to design and build flood prevention projects in Santa C

- The US Forest Service reports t

Event: Floyd	Organization: SAW
Mission Number: COE-SAD-12	Mission Type: Water

Mission Execution

*Execution Name: Deliver Water
Location: CESAW
Est Complete Date: 30-Sep-1999 (dd-mon-yyyy)
Execution Activity Type: Water - Procure (lt)
Initial Amount: 0
Execution Amendments: 5,868,000
Execution Amount: 5,868,000

Last Edit Date: 281543zSep1999
Actual Complete Date: (dd-mon-yyyy)
Unit of Measure: LT
Other Unit of Measure: Trucks
Convert using Ratio: 40000

Transaction Totals

Cumulative Amount	Balance	Total Required	Percent
5,868,000.00	.00	5,868,000.00	100.00

Remarks

Per contract, ordered quantities are rounded to equal truck loads of 18,000 liters. This may result in a difference between Execution Amount and Total Required due to rounding. 0002 - 2,106,000 Kinston NC 19-22 Sep 99 $910,380.00 0003 - 1,134,000 Wilmington NC 19-21 Sep 99 $487,620.00 0004 - 1,134,000 Roanoke Rapids NC 19-21 Sep 99 $488,917.80 0005 - 756,000 Kinston NC 23-24 Sep 99 $325,080.00 0006 - 756,000 Wilmington NC 22-23 Sep 99 $325,080.00 0007 - 756,000 Roanoke Rapids NC 22-23 Sep 99 $347,760.00 0008 - 990,000 Roanoke Rapids NC 24-28 Sep 99 $455,400.00 0009 - 990,000 Kinston NC 25-29 Sep 99 $425,700.00 Effective 1145, FEMA informed ESF-3 team leader that water was no longer required AND directed that the missions be terminated immediately. Contracting Officer issued verbal ORDER TO terminate undelivered balance OF water missions FOR Wilmington District effective 1500 23 September 99. Shipments OF bottled water enroute FOR delivery TO Kinston AND Roanoke Rapids will be accepted. Shipments OF bottled water that depart FOR Kinston AND Roanoke Rapids after 1500 23 Sep 99 will NOT be accepted.

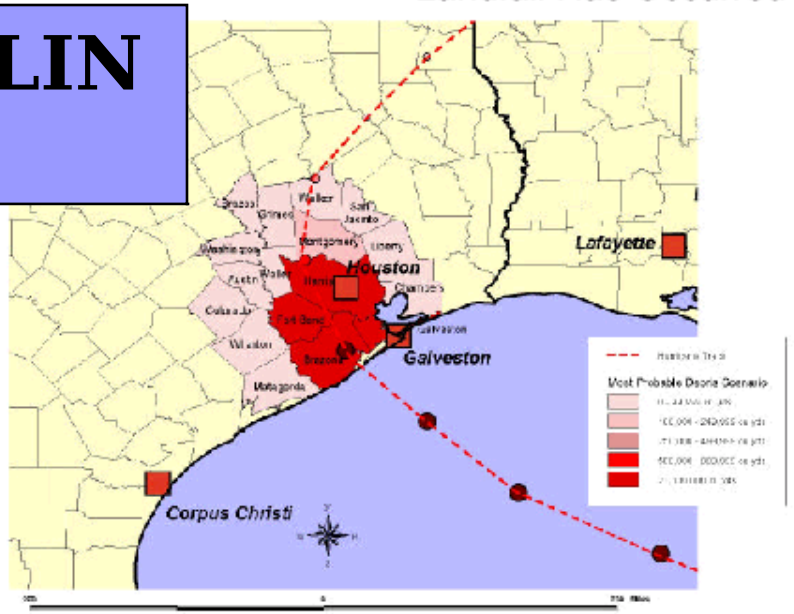
Exercise Texas Storm 2000 Debris Model Results

Landfall Has Occurred



Most Probable Landfall Debris Model Results

Texas - 20,028,000 yd³

Model results per county - each state - on following page

This hurricane scenario is based on a Category 4 storm making landfall in near proximity to Galveston and continuing with hurricane force winds past Houston

ENGLink INTERACTIVE

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(time and date)*** forecast.

The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds.

Information provided by these models are For Official Use Only!

Close Out Transition Plan

ANNEX G Real Estate - to Hurricane Georges Response and Recovery Closeout Transition Plan

1. Description of mission (task): Real Estate (RE) is responsible for acquiring, managing and terminating or obtaining releases from all real estate interests needed by the U. S. Army Corps of Engineers (USACE) in support of response and recovery activities. Generally speaking, the Commonwealth of Puerto Rico is responsible for providing the real estate interests required for emergency activities and RE would obtain rights of entry to Commonwealth-provided lands. In some cases, the Commonwealth may not be able to provide real estate interests. USACE RE may then be required to obtain those real estate interests. RE is also responsible for reviewing real estate interests obtained by local entities, for closing real estate interests, obtaining appropriate releases of government liability and processing claims, if any.

2. Goals and Objectives: Ensure all real estate interests are properly acquired, have suitable environmental assessments and are used for the purpose for which acquired. Subsequently, ensure that all real property interests are properly terminated and the appropriate releases are secured. Acquisitions include, but are not limited to, obtaining....

Close Out Transition Plan

- Requested by FEMA to prevent “lifetime” recoveries
- May begin as early as 2 weeks into event
  - What is your end point
  - How will you get there
  - What do you plan in the meantime
- Each mission has RE requirements
- Also, may have separate RE Annex

Close Out Transition Plan

- Real Property acquired to date, expected in future
- RE Issues
  - Closeout is dependent on timelines established by others
  - Insufficient coordination may result in inability to obtain continued use of needed sites
  - Unexpected work may exceed on-site manpower
  - Number of Real Estate personnel needed each term

After Action Report

- Account of event
- Account of missions
- Lessons Learned
